Intuition: • The Pumping Lemma Of Regular Languages Tell Us That – If There Was A String Long Enough To Cause A Cycle In The DFA For The Language, Then We Could “pump” The Cycle (a Piece Of The String) And Discover An Infinite Sequence Of Strings That Had To Be In The Language. • The Pumping Lemma Of Context-free Languages Tell Us That – If There Was A String Long Enough To Cause A ... The Pumping Lemma And Closure Properties

Closure Properties A closure property of a language class says that given languages in the class, an operator (e.g., union) produces another language in the same class. Example: We saw that regular languages are closed under union, concatenation and Kleene closure (star) operations. We will see more examples: intersection, difference, reversal, Mar 6th, 2024

Background Information For The Pumping Lemma For Context ...

Closure Properties For Context-Free Languages • Theorem: The CFLs are closed with respect to the union, concatenation and Kleene star operations. • Proof: (details left as an exercise) Let L_1 and L_2 be CFLs. By definition there exist CFGs G_1 and G_2 such that $L_1 = L(G_1)$ and $L_2 = L(G_2)$. – For union, show how to construct a grammar G ... May 14th, 2024
